

Middle Rio Grande Water Planning Region

Elevation Contours in Planning Region

Legend

-  Planning Region
-  Intermittent water body
-  Perennial water body
-  Perennial river or stream
-  Intermittent stream
-  100 m Elevation Contours
-  County Boundary
-  Interstate
-  State Highway
-  U.S. Highway
-  Township/Range

Produced by New Mexico Water Resources Research Institute, August, 2005

Base map prepared by the U.S. Geological Survey

Compiled from digital data provided by the New Mexico Resource Geographic Information System Program (RGIS). Original base maps digitized from 1:500,000 mylar sheets and 100,000 paper maps for New Mexico. These data meets National Mapping Accuracy Standards for 1:500,000 and 1:100,000 scale maps. Boundary of the Middle Rio Grande Planning Region is based on county lines and surface drainage divides. Elevation contours derived from 1:100,000 USGS DLGs.

Horizontal accuracy: At the scale of 1:500,000 at least 90 percent of the points tested are within 1/30th inch (0.033 inch), or within 423 ground meters, of their true location.

Projection: Universal Transverse Mercator, Zone 13, Units meters, NAD83.
