Base map prepared by the U.S. Geological Survey

Compiled from digital data provided by the New Mexico Resources Geographic Information System Program (RGIS). Original base maps digitized from 1:500,000 and 1:1,000,000 scale maps.

The riparian and agricultural coverage are based upon the landuse coverages that was developed by USGS/EPA at 1:250,000 scale. Boundary of the Northeast New Mexico Water Planning Region is based on county lines and surface drainage divides.

Horizontal accuracy: At the scale of 1:650,000 at least 90% of the points tested are within 1/30th inch (0.0333 inch), or within 547 ground meters, of their true location.
