Produced by New Mexico Water Resources Research Institute, January 2001
Base map prepared by the U.S. Geological Survey

Compiled from digital data provided by the New Mexico Resource Geographic Information System Program (RGIS).
Original base maps digitized from 1:500,000 mylar sheets and 100,000 paper maps for New Mexico. These data meets National Mapping Accuracy Standards for 1:500,000 and 1:100,000 scale maps. Shaded relief provided by RGIS and is based on 1:250,000 Digital Elevation Models (DEMs) created by the U.S. Geological Survey. Boundary of the Rio Chama Water Planning Region is based on New Mexico county boundaries, and surface drainage divides. The cadastral accuracy of the county boundaries where verified by the use of 1:100,000 Public LandSurvey System (PLSS) from RGIS.
Horizontal accuracy: At the scale of 1:500,000 at least 90 percent of the points tested are within 1/30th inch (0.033 inch), or within 423 ground meters, of their true location.
Projection: Universal Transverse Mercator, Zone 13, Units meters, NAD83.
