Tularosa, Sacramento River, and Great Salt Basin Water Plan

Land Use

Legend

- City or Town
- Planning Region
- County Boundary
- Perennial Stream
- Intermittent Stream
- Intermittent water body
- Perennial water body
- State Road or Highway
- Interstate
- U.S. Highway
- Township/Range

Land Use

- Reservoirs
- Bare Exposed Rock
- Bare Ground Tundra
- Mixed Trunda
- Wet Trunda
- Confined Feeding Operations
- Cropland and Pasture
- Deciduous Forest Land
- Dry Salt Flats
- Evergreen Forest Land
- Forested Wetland
- Herbaceous Rangeland
- Herbaceous Tundra
- Commercial and Services
- Industrial
- Industrial and Commercial Complexes
- Other Urban or Built-up Land
- Mixed Urban or Built-up Land
- Residential
- Mixed Barren Land
- Mixed Forest Land
- Mixed Rangeland
- Nonforested Wetland
- Orchards, Groves, Vineyards, Nurseries and Ornamental Horticultural Areas
- Other Agricultural Land
- Sandy Areas Other Than Beaches
- Shrub and Brush Tundra
- Shrub-Brushland Rangeland
- Strip Mines, Quarries, and Gravel Pits
- Transitional Areas
- Transportation, Communications and Utilities

Produced by New Mexico Water Resources Research Institute, May 2006

Base map prepared by the U.S. Geological Survey

Compiled from digital data provided by the New Mexico Resource Geographic Information System Program (RGIS). Original base maps digitized from 1:500,000 mylar sheets and 100,000 paper maps for New Mexico. These data meets National Mapping Accuracy Standards for 1:500,000 and 1:100,000 scale maps. Shaded relief provided by RGIS and is based on 1:250,000 Digital Elevation Models (DEMs) created by the U.S. Geological Survey. Boundary of the Tularosa, Sacramento, and Great Salt Basins Water Planning Region is based on surface drainage divides.

Horizontal accuracy: At the scale of 1:900,000 at least 90 percent of the points tested are within 1/30th inch (0.0333 inch), or within 762 ground meters, of their true location.
Projection: Universal Transverse Mercator, Zone 13, Units meters, NAD83.
