

Tularosa, Sacramento River, and Great Salt Basin Water Plan

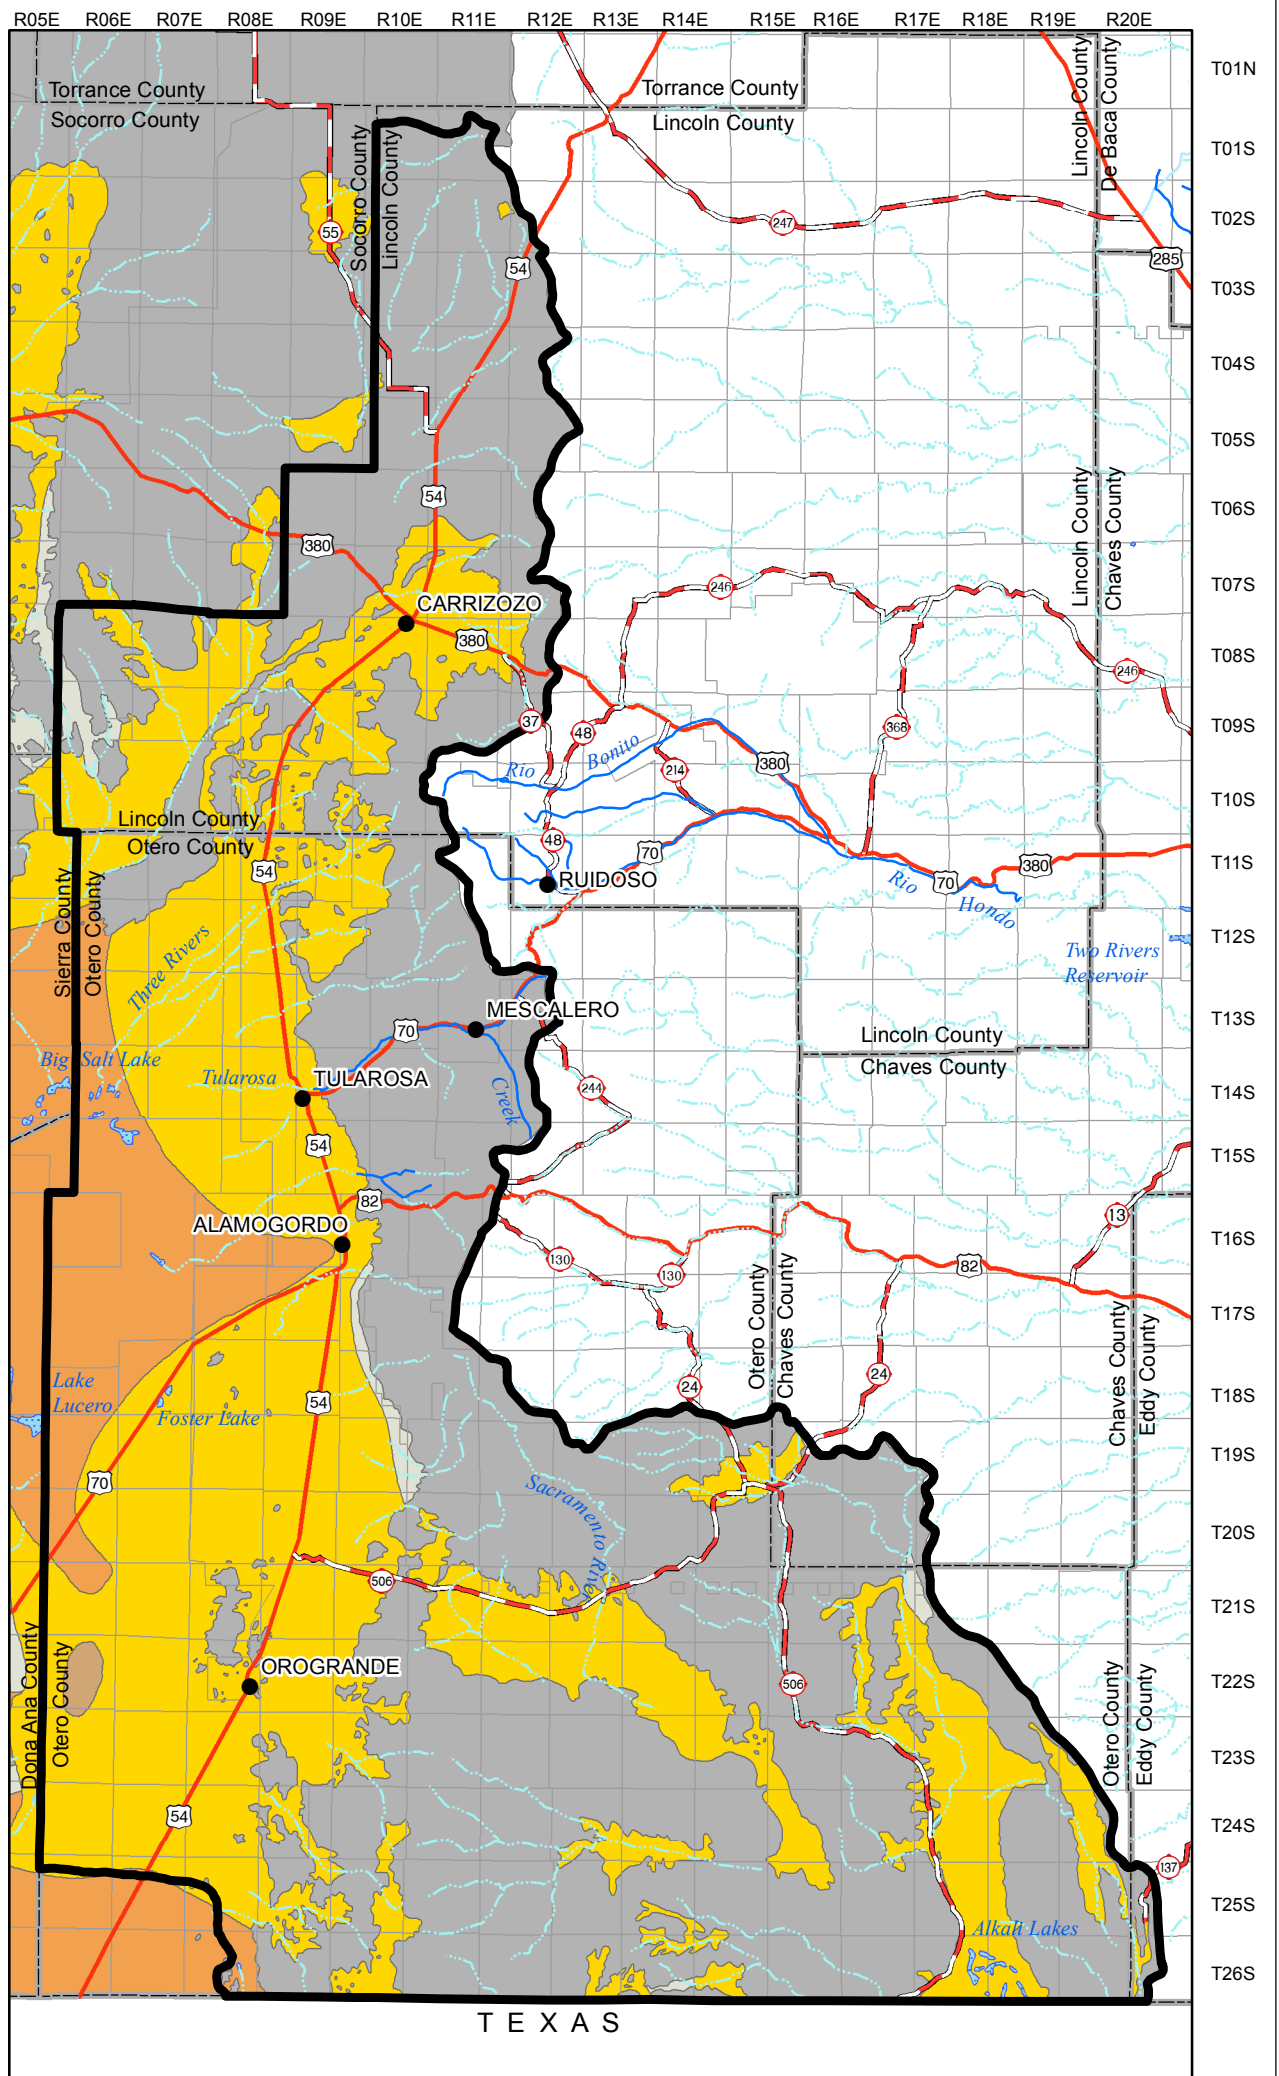

Chemical Type Water

Legend

- City or Town
- ▭ Planning Region
- County Boundary
- ~ Perennial Stream
- ~ Intermittent Stream
- Perennial water body
- Intermittent water body
- State Road or Highway
- Interstate
- U.S. Highway
- Township/Range

Chemical type water

- Calcium magnesium bicarbonate
- Sodium bicarbonate
- Sulfate
- Chloride
- Consolidated Rock
- No Data Available

Produced by New Mexico Water Resources Research Institute, May 2006

Base map prepared by the U.S. Geological Survey

Compiled from digital data provided by the New Mexico Resource Geographic Information System Program (RGIS). Original base maps digitized from 1:500,000 mylar sheets and 100,000 paper maps for New Mexico. These data meets National Mapping Accuracy Standards for 1:500,000 and 1:100,000 scale maps. Shaded relief provided by RGIS and is based on 1:250,000 Digital Elevation Models (DEMs) created by the U.S. Geological Survey. Boundary of the Tularosa, Sacramento, and Great Salt Basins Water Planning Region is based on surface drainage divides.

Horizontal accuracy: At the scale of 1:900,000 at least 90 percent of the points tested are within 1/30th inch (0.0333 inch), or within 762 ground meters, of their true location.

Projection: Universal Transverse Mercator, Zone 13, Units meters, NAD83.
